EDUCATION

Amrita Vishwa Vidyapeetham

B.Tech - Computer Science and Engineering - **CGPA – 8.99/10**

2023 – 2027

Coimbatore, Tamil Nadu

EXPERIENCE

Full Stack Developer, Arya Club

Dec 2025 to Present

Developed a centralized Arya Club platform with responsive frontend, secure backend, member management & event management features. Currently developing an AI-powered Sanskrit Sloka chatbot for meanings, explanations & learning.

Data Analyst Research Intern, Amrita TAG

Aug 2024 to Apr 2025

Processed and visualized Indian forest records using Matplotlib, Seaborn and Tableau, quantifying CO_2 sequestration across diverse biomes. Recommended suitable tree species for regional carbon absorption and sustainable management

TECHNICAL SKILLS

Programming Languages: C++, Java, Python, C

Development Skills: HTML, CSS, Bootstrap, Tailwind, JavaScript, React, Node.js, Express, REST APIs, MySQL, MongoDB, Spring Framework, Spring Boot, Spring JDBC, Spring Data JPA, Spring AI, Spring Security, FastAPI

Data Analysis: Numpy, Pandas, Matplotlib, Seaborn, Tableau

DevOps & Cloud: Docker, Kubernetes, CI/CD, Git, GitHub, AWS Cloud

Academic Coursework: DSA, DBMS, OOPS, OS, Networks, Machine Learning, Software Development

AI : Deep Learning, GenAI, Agentic AI

PROJECTS

IntelliCart: AI-Driven Enterprise Marketplace | [GitHub](#)

Engineered a fully reliable and scalable e-commerce ecosystem based on a robust microservices architecture.

- Implemented Apache Kafka for asynchronous communication, real-time inventory updates, and notifications.
- Developed an AI Recommendation Engine with Redis caching for faster personalized product recommendations.
- Built a secure & responsive application with JWT authentication, RBAC, and real-time customer/seller experiences.
- Implemented Order, Inventory, and Payment services with secure transactions and inventory consistency.

Tech: JavaScript and React, Spring Boot, Fast API, PostgreSQL, Redis, Kafka, Docker, REST APIs.

AI Chat Application with Persistent Conversations | [GitHub](#)

Constructed a web application with multi-threaded real-time communication and persistent session history.

- Implemented Google OAuth and JWTs for secure authorization, ensuring scalable API access & a robust security layer.
- Established a messaging engine with multi-thread support & automated database persistence for seamless state recovery.
- Included document processing capabilities for automated analysis of PDF, image, and text-based uploads.

Tech: JavaScript and React, Google OAuth, Node, Express, MongoDB, Gemini API.

Real-Time Collaborative Digital Canvas Platform | [GitHub](#)

Engineered a collaborative platform enabling real-time interaction, meetings, and AI-assisted workflows.

- Built real-time collaboration using Socket.io for live canvas sync, cursor tracking, chat, reactions, and activity feed.
- Developed meeting system with scheduling, join via ID and share link, role-based permissions, session persistence, WebRTC audio video, screen sharing and recording with Cloudinary.
- Designed advanced canvas with layers, shapes, undo redo, zoom pan, sticky notes, auto-save, AI shape correction, import export JSON, shareable links, and post-meeting history via dashboard.
- Implemented JWT authentication with token rotation and email verification, along with REST APIs.

Tech: JavaScript and React, Node, Express, MongoDB, WebRTC, Cloudinary, REST API, Agile process.

AWARDS / ACHIEVEMENTS

- [Won Code Clash conducted by IIT Hyderabad.](#)
- Semi-Finalist **Flipkart Grid 8.0**

- Solved **300+** problems in **Leetcode**

CERTIFICATIONS

- [Full Stack Development – Apna College](#)

- [Generative AI & Natural Language Processing – Google](#)
